

Face-to-face training during which you can feel safe

We are happy to reopen our face-to-face trainings in our beautiful premises. We look forward to seeing you again. Fortunately, the restrictions on coronavirus have already been relaxed, however, bearing your safety in mind, we are implementing the following measures:

- Disinfectants and disinfectant wipes are available at your desks, disinfectant liquid soap is also available in the bathroom;
- The training room should allow for each student to have enough space around him (2 meters from the nearest person), we politely urge students to follow the recommended distance of 2 meters at all times;
- Refreshments meet the highest possible hygienic standard and for this reason are packed in individual boxes;
- The training room is regularly ventilated from the outside;
- All premises are regularly disinfected;
- Lecturers and staff also observe increased hygienic measures;
- Protection of the upper respiratory tract (nose and mouth) is mandatory for all participants.

At the same time, we politely ask that you do not enter our premises if you have any symptoms of COVID-19 or other easily transmitted diseases (especially temperature, cough or difficulty breathing). We will be happy to see you again when you are healthy and full of energy and when you will be able to fully enjoy our training. We believe that in order to protect the health of all involved, you will appreciate and respect the above-described measures. We hope that it will allow you to enjoy our training to its fullness while feeling safe at all time. See you soon!
